

AUTOMATIC EXTERNAL DEFIBRILLATOR

objectives

Our automated external defibrillator (AED) training course allows candidates to learn the theory behind defibrillation and the practical element of using an AED during resuscitation. Our AED course can be combined with other, more advanced first aid courses such as emergency use of Oxygen and airway management. We also offer candidates on our First aid at work courses the opportunity to 'bolt-on' certificated AED training to their first aid at work course, for only £12. AED awareness is included for free on all courses, but not certificated.
