

# EMERGENCY FIRST AID AT WORK + F (FORESTRY) LEVEL 2

## objectives

The Emergency First Aid at Work Level 2 qualification (EFAW) is ideal for most businesses whose risk assessment has identified that there is no requirement for a fully trained FAAW first aider for their workplace.

This version of the EFAW course includes the extra subjects required by the Forestry Commission. Include severe cuts from chainsaws, crush injuries, Hypothermia and Lyme Disease.

This course must be at least 7 contact hours and run over a minimum of 1 day and the certificate is valid for 3 years.

The HSE recommend annual refresher training to avoid skills fade. We offer free training on all FAAW and Paediatric courses.
